SOURCE:

25X1X

1. The Czechoslovak Army owns railroad cars of the type shown in the enclosure. These cars appeared for the first time during the fall of 1951.
2. Among the freight cars owned by the Army the majority are closed cars, marked "Z" and "Zt", and open cars (gondolas), marked "Ut" and "Vut". The cars originate from production series after 1945; they are of Czechoslovak production and do not belong to war booty or UNRRA cars. The number of Army-owned railroad cars amounts to approximately one-fourth to one-third of all dispatched railroad cars in a station.
3. The army property marking is a yellow triangle in the left upper corner of the sliding opening or skipping sidewall of these cars. The color is fair yellow; the dimensions of the triangle are approximately 50 x 50 x 50 cm.

Enclosure: Sketch of railroad cars (1 page) (State, Army 3, Air, ORR 2, OCI)
